HOME CONSTRUCTION DIVISION

CHICAGO, ILL. or PORT OF NEWARK, N. J.

Please don't confuse these buildings with our fine permanent homes of brick, stone, frame and stucco.

Our regular homes are individually designed to give each customer exactly what he wants in architecture, size, room arrangement, installations and price.

They are in no way "sectional" or "portable," but are built exactly like any other fine homes.

NEW FREE PLAN BOOK

"America's New Low Cost Homes"

Write to Dept. 864-S, Sears,
Roebuck and Co., Drawer F,
Newark, N. J. — or Chicago,
Illinois.

This book contains plans and illustrations
of more than one hundred fine homes.

Use One of Our Easy Payment Order Blanks

The above terms apply only to garages. For terms on garage purchases over \$500 write to Sears, Roebuck and Co., Dept. 665, Chicago, Ill., or Drawer F, Newark, N. J.

If you are interested in terms on **Summer Cottages** or **Log Cabins** write to Sears, Roebuck and Co., Dept. 665, Chicago, Ill., or Drawer F, Newark, N. J. Tell us how much you can pay as a deposit, how much you can pay monthly, and whether or not you own the property on which the building is to be located.

Playhouses are sold only for cash in full with order.

PRICES SHOWN ON SEPARATE SHEET ENCLOSED

SEARS GARAGES

Sectional Type

"Sectional Garages" are most economical. They are built of sections, cut, fitted and assembled accurately in our factories, ready for bolting together on the lot. Doors and windows are already hung in frames.

Specifications

These Specifications Are Guaranteed Accurate

They are intentionally statistical. When we say "3x6 No. 1 Yellow Pine or Fir," we believe that tells you more than if we said "extra strong, knotless material that is more than sufficiently sturdy, and which will look beautiful when stained and varnished."

Many specifications read that way; they sound well but are indefinite as to **GRADE** and **KIND** of material. Please remember this when you compare Sears unusually high specifications with any others that may be submitted to you.

Avenue and Parkway

The **Material** is all carefully selected for strength, wear, and adaptability to paint.

FOUNDATIONS. Garages should be anchored to concrete foundations, so no posts, floor joists, or wood flooring are furnished. Foundation posts at small extra cost if desired.

SILLS. 3x6 No. 1 Yellow Pine or Fir.

WALL SECTIONS. 3 ft. wide and 7 ft. high, which two men can handle with ease. No. 1 Douglas Fir or Yellow Pine drop siding, 1-inch thick, finished standard with tongue and groove, smooth on inside. Nailed securely with rustproof cement coated nails. Sections interchangeable, and fit perfectly, interlocking on both sides at top and bottom, and firmly bound in place by sills and plates bolted into position. The 3-inch reinforced joints are actually stronger than 2x4 studding.

ROOF SECTIONS. 3 ft. wide No. 1 Douglas Fir or Yellow Pine beaded ceiling, $\frac{5}{8}$ inches thick.

ROOFING. Oriental Slate Surfaced Roofing guaranteed by Sears, Roebuck and Co., for 17 years. Shipped in rolls with nails and cement. Sea Green shipped unless you say red is wanted instead.

TRIPLE SLIDING DOORS. Furnished for all Simplex Sectional Garages. These wonderful doors are described on Page 14.

DOORS AND WINDOWS. Good quality. Hung in frames, constituting part of section. No fitting or hanging to do. Doors made of White Pine or Douglas Fir, 2 ft., 6 in. by 6 ft., 6 in., $1\frac{3}{4}$ in. thick, upper half glazed. Complete with hardware, including mortise locks. Sash or two-light glazed windows furnished, according to plans.

PAINT. Entire outside of garages primed one coat of gray paint, trimmed in white.

SHIPMENT. Each garage is inspected before being shipped to make sure that all parts fit perfectly. Securely crated with steel strapping.

PLANS. We furnish clear and easily understood instructions and working plans for every building we sell.

Utility and Economy

The Economy and Utility will give you splendid service at the lowest possible price. The framework of 2x2's and 2x4's forms part of the wall sections, easily fastened together with the bolts and screws furnished.

WALL SECTIONS. Select No. 1 Douglas Fir or Yellow Pine, tongued and grooved drop siding, 1-inch thick, finished standard.

ROOF SECTIONS, for Economy made of 1 inch No. 2 Fir or Yellow Pine, dressed and matched. For the Utility, $\frac{5}{8}$ x 4-inch No. 1 Fir or Yellow Pine, dressed and beaded on the under side.

DOUBLE DOORS. No. 1 Douglas Fir or Yellow Pine, $\frac{3}{4}$ -inch matched and beaded partition. Opening size 8 ft. wide. Strongly built. Ready to hang with 3 pair large steel strap hinges.

WINDOWS. Four-light glazed sash 28x30 in., hinged at top.

ROOFING. Best-of-All black asphalt, 50-lb. rolls, with nails and cement, guaranteed for 14 years.

PAINT. Primed one coat of gray trimmed in white.

Attractive Hip Roof Garage

The AVENUE—For One or Two Cars

The home for your car should be bought as intelligently as the home for your family. It should last as long, and be equally attractive. Even a single car garage will soon pay for itself in the rent you save, and a two-car size can often be a source of added income.

The Avenue Sectional Garage will harmonize with nearly any style of architecture. The illustration shows the two-car design with big, modern driveway doors, 3 full sized sliding windows, and a convenient service door. It is available in the eight sizes shown, and will prove a splendid investment for any home owner.

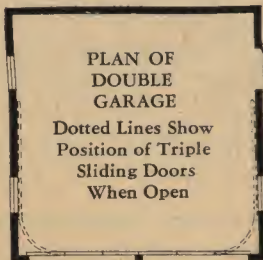

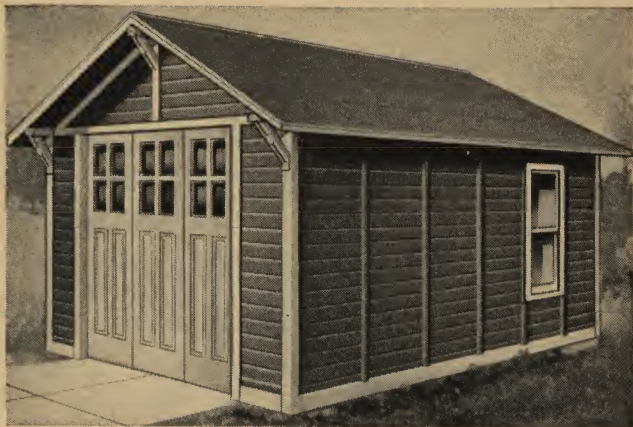

In the following one-car sizes:

- 55P31— 9 ft. 3 in. x 18 ft. 3 in.
- 55P33—12 ft. 3 in. x 18 ft. 3 in.
- 55P34—12 ft. 3 in. x 21 ft. 3 in.

In the following two-car sizes:

- 55P36 —16 ft. 3 in. x 18 ft. 3 in.
- 55P37 —18 ft. 3 in. x 18 ft. 3 in.
- 55P38A—18 ft. 3 in. x 21 ft. 3 in.
- 55P38B—21 ft. 3 in. x 18 ft. 3 in.
- 55P39 —21 ft. 3 in. x 21 ft. 3 in.

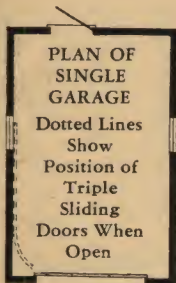

Gable Roof Garage

The PARKWAY—For One or Two Cars

Many car owners like to make minor repairs themselves. We find a number of purchasers of Sears garages who buy a two-car size even if they have but one car, and no intention of renting the extra space. Then they install a little work-bench, racks for tools, and plenty of room for patching tires or changing spark plugs.

The Parkway is ideal for the average family; its trim, neat lines blend well with homes of nearly any architectural style, and the variety of sizes in which it is available makes it suitable for any private garage requirements. The illustration shows the one-car garage with glazed doors, two full sized windows, and a convenient service door.

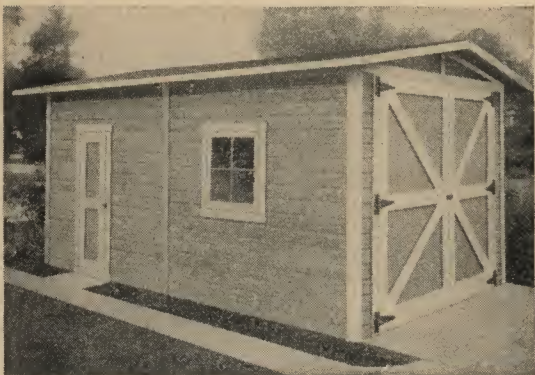

Furnished in the following one-car sizes:

- 55P21— 9 ft. 3 in. x 18 ft. 3 in.
- 55P23—12 ft. 3 in. x 18 ft. 3 in.
- 55P24—12 ft. 3 in. x 21 ft. 3 in.

Furnished in the following two-car sizes:

- 55P26 —16 ft. 3 in. x 18 ft. 3 in.
- 55P27 —18 ft. 3 in. x 18 ft. 3 in.
- 55P28A—18 ft. 3 in. x 21 ft. 3 in.
- 55P28B—21 ft. 3 in. x 18 ft. 3 in.
- 55P29 —21 ft. 3 in. x 21 ft. 3 in.

Low Cost Design Garage

The UTILITY—For One or Two Cars

This popular design comes in four sizes. The low gable roof and the general simplicity of the design, make it harmonize well with practically any small home. Easily bolted together, with the service door and window sash already built into place. Any handy man can easily assemble this garage in a short time.

The doors are of the swinging type, easily operated, and the service door at the side is an added convenience. Payments as low as ten dollars down and a few dollars monthly bring you this economical garage ready for erection. If comparing prices, be sure to compare specifications too. See page 3 for detailed description of this economical garage.

Furnished in the following one-car sizes:

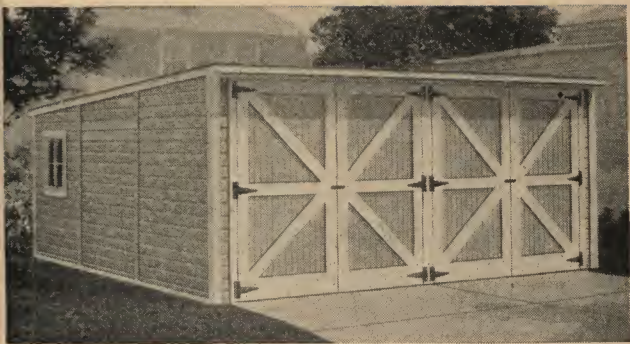

- 55 P 60—10 ft. x 14 ft.
- 55 P 61—10 ft. x 16 ft.
- 55 P 62—10 ft. x 18 ft.

Furnished in the following two-car size:

- 55 P 67—18 ft. x 18 ft.

Our Lowest Price Garage

The ECONOMY—For One or Two Cars

PLAN OF
SINGLE
GARAGE

Why should any car owner continue to pay rent in a public garage, often at some distance from his home, when for just a few dollars down and the balance monthly, he can own, on his own property, a splendid garage like this?

The Economy is a sturdy, simple, shed roof design. Its price is so low that one year's average garage rent will pay for it, yet it will continue to serve you well year after year. In the interests of economy, there is one sash only in the one car sizes, and two sash in the 18 by 18-ft. design. Service doors have been omitted too, and every effort made to offer this at the very lowest possible price, consistent with the quality of material that goes into every building sold by Sears, Roebuck and Co.

PLAN OF
DOUBLE
GARAGE

Single car sizes with one sash

55 P 50—10 feet by 14 feet
55 P 51—10 feet by 16 feet
55 P 52—10 feet by 18 feet

Two-car size with two sash

55 P 57—18 feet by 18 feet

Steel Garages in a Variety of Styles and Sizes

The Monitor Sectional Fireproof Steel garage with round roof.

Garages shown on this page are of 26-gauge new "open hearth" steel sheets, heavily galvanized. The sections bolt together easily and require no soldering or riveting. In each corner two 14-gauge solid steel braces form handy shelves. The MONITOR, without windows or side door, in the following sizes:

- 55 P 70—9 ft. 4 $\frac{3}{4}$ in. x 15 ft. 1 $\frac{1}{2}$ in.
- 55 P 71—9 ft. 4 $\frac{3}{4}$ in. x 17 ft. 7 $\frac{1}{2}$ in.
- 55 P 72—9 ft. 4 $\frac{3}{4}$ in. x 20 ft. 1 $\frac{1}{2}$ in.

These garages have hinged steel doors opening 8x7 $\frac{1}{2}$ ft., glazed at top with wire reinforced glass.

Fireproof, Stormproof, Substantial, Easy to Erect

The Merrimac—Neat gable roof steel garage with one window.

The Merrimac is a popular design gable roof garage for localities where fire restrictions will not permit a wooden garage. It is a strong, substantial, fireproof garage, easily erected. Furnished in the following sizes:

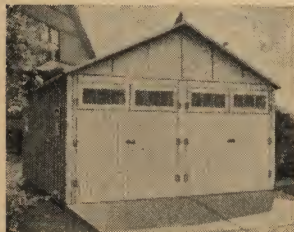

- 55 P 81—10 ft. 2 $\frac{3}{4}$ in. x 15 ft. 1 $\frac{1}{2}$ in.
- 55 P 82—10 ft. 2 $\frac{3}{4}$ in. x 17 ft. 7 $\frac{1}{2}$ in.
- 55 P 83—10 ft. 2 $\frac{3}{4}$ in. x 20 ft. 1 $\frac{1}{2}$ in.
- 55 P 84—11 ft. 10 $\frac{3}{4}$ in. x 15 ft. 1 $\frac{1}{2}$ in.
- 55 P 85—11 ft. 10 $\frac{3}{4}$ in. x 17 ft. 7 $\frac{1}{2}$ in.
- 55 P 86—11 ft. 10 $\frac{3}{4}$ in. x 20 ft. 1 $\frac{1}{2}$ in.

The Merrimac includes one fireproof window and frame of 26-gauge galvanized wire glass, hinged top.

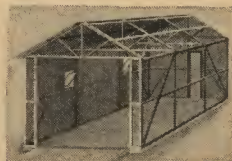

Double Garages Built Over Framework of Angle Irons

The Ironsides—gable roof steel garage in four convenient sizes.

The good rent obtainable for half of a strong fireproof steel garage like the Ironsides, soon makes it pay for itself. Furnished in the following sizes:

- 55 P 95—15 ft. 10 in. x 17 ft. 6 in.
- 55 P 97—18 ft. 4 in. x 17 ft. 6 in.
- 55 P 98—20 ft. x 20 ft.
- 55 P 99—23 ft. 4 in. x 20 ft.

Framework for the Ironsides consists of sills, wall plates, stringers and uprights of 1x1x $\frac{1}{2}$ in. angle iron; roof trusses, roof purlins, and door frames of 1 $\frac{1}{2}$ x1 $\frac{1}{2}$ x $\frac{1}{2}$ in. angle iron; diagonal braces of 1x $\frac{1}{2}$ in. iron. Has 4 windows, a side door, and two sets of double hinged doors with reinforced wire glass at top.

SEARS GARAGES

Factory-Cut Type

"Sears Factory-Cut" garages are individually built just as any good carpenter would build them. The only difference is that most of the sawing and waste has been eliminated by cutting and numbering, in our factories, the framing members, ready for nailing into place. This not only saves time and money in erection, but assures perfect precision fitting of all parts.

See Page 17 for Description of One of Our Great Factories.

Specifications for Sears Ready Cut Garages

SILLS: 2x4 or 2x6.

WALL PLATES: 2x4 or 2x6 double.

RAFTERS AND STUDS: 2x4 or 2x6, 22½ in. apart.

SHEATHING: 1x8 Shiplap sound quality furnished with garages illustrated with wall shingles.

ROOF BOARDS: 1x4 spaced 2 in. apart.

ROOF COVERING: 16 in. best grade clear edge grain Red Cedar Shingles laid 4½ in. face with galvanized nails.

FLOOR: No wood floors included. Cement to be obtained locally.

OUTSIDE WALL COVERING: 24 in. No. 1 Royal Red Cedar Shingles or 1x6 No. 1 drop siding.

DOORS: All doors 1½ in. thick. Service doors glazed or 6 panel type as plans show. For illustration of driveway doors, see page 14. We furnish triple sliding doors.

WINDOWS: All windows to be check rail 1½ in. thick, clear Ponderosa Pine, glazed 2 light or 12 light, as plans show.

FRAMES: Door and window frames to be 1½ in. rabbeted. Frames for driveway doors to be as shown on plans.

OUTSIDE FINISH: All outside finish including moldings, to be select grade.

HARDWARE: All rough hardware, nails, and sash weights included. All finish hardware, consisting of door locks, butts sash, locks, and lifts, in dull brass finish. Hardware for driveway doors included.

SHEET METAL: Heavy galvanized metal ridge cap for all hips and ridges, and tin shingles for flashing, as plans show.

INSULATION: With wall shingles, we include heavy re-inforced waterproof building paper to be used between the sheathing and wall shingles.

PAINT: For all exterior woodwork, such as frames, trim, moldings, windows, and doors, 3 coats of Master-Mixed Paint, color to be selected by you. For wall shingles, one dip coat and one brush coat of super service shingle stain.

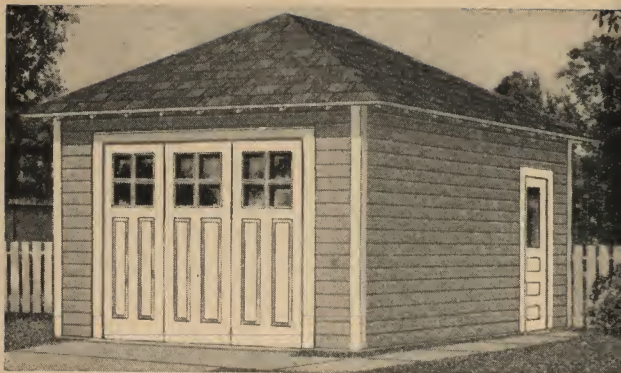

These Specifications Are Guaranteed Accurate

They are intentionally statistical. When we say "3x6 No. 1 Yellow Pine or Fir," we believe that tells you more than if we said "extra strong, knotless material that is more than sufficiently sturdy, and which will look beautiful when stained and varnished."

Many specifications read that way; they sound well but are indefinite as to GRADE and KIND of material. Please remember this when you compare Sears unusually high specifications with any others that may be submitted to you.

Popular Hip Roof Design

The DECATUR—for One or Two Cars

Garages are service buildings, and it is unnecessary to waste lumber in building them, whether for purposes of ornament or for unnecessary strength. The simplicity of this particular garage is reflected in its low price, as well as in its general attractiveness. It should look well with practically any modern home, large or small.

The one car sizes have a single window and the two car designs, two windows. Both types have convenient service doors at the side. Study the specifications as shown on Page 9, and don't confuse this garage, or those on the following pages, with the sectional type shown on the preceding pages. This garage is available in the six sizes listed below. See insert for prices.

A Favorite Suburban Type

The BARTLETT—For One or Two Cars

Gable roofs like that of the Bartlett, lend distinction and neatness to buildings of any size. This particular design is one of our most popular garages, especially in and around the metropolitan areas, and its surprisingly low price is made possible only by our great volume of business.

The design illustrated is the single car type, but as shown below, this garage is available in both single and double sizes, ranging 12 feet by 18 feet to 18 feet by 22 feet. Our Guarantee is your assurance of satisfaction, and if you wish them, easy payment terms are offered for your added convenience. See the special insert showing prices. Terms are explained on page two.

Distinctive Hipped Gable Roof

The DOUGLAS—for One or Two Cars

Many small homes are built with roof lines similar to those of this attractive garage. Interesting in any setting, it is especially appropriate with a home having gables of this type.

Think of the convenience of having your car, at all times, just a few steps away! A garage of your own is especially appreciated in unpleasant weather, yet even on pleasant evenings, it is not enjoyable to walk home from a public garage after a tiring day of driving. And best of all, the rent you now pay for a garage will enable you to actually buy one of your own, the Sears way!

Glazed doors and windows admit plenty of light, and this model is offered in an adequate range of sizes. See list below.

Gable Ends at The Sides Here

The TUDOR—For One or Two Cars

The Tudor is a beautiful garage and increases the value of any property. Its simplicity and excellent proportions make it harmonize well with homes of any size or architectural treatment, yet its price is low and terms, if desired, convenient.

Illustration shows 2-car garage. Single car garage has gables in front and rear instead of on sides.

The driveway enters at the eaves side rather than at the gable ends, as in the Bartlett design, and the general exterior treatment is different. When comparing prices of this, or any other Sears garage, with others offered you, be sure to study the specifications. You know exactly what you get, the Sears way, and satisfaction is assured you by the Sears Guarantee. You can save money by owning your own garage, and you can increase those savings by getting a Sears garage!

Tudor—55P1410

Single car sizes with one window:

18 feet by 22 feet

Your Choice of Doors

All garages excepting the Utility and the Economy, which have regular hinged doors, are equipped with our "Triple Sliding Doors". These, and a popular optional type, available at small extra cost, are described below.

Triple Sliding Doors

Smooth Indoor Operation on Roller Bearings

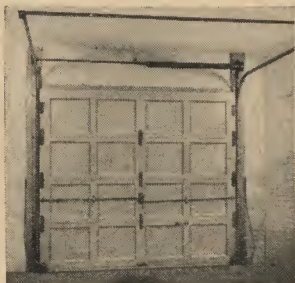

Open instantly in any weather. Can not blow shut nor get out of order. Roller bearings inside of hollow steel track on inside of garage. Doors will hang rigid as long as garage lasts. A 10-year-old child can open them easily. Opening 8 ft. wide by 7 ft. 3 in. Best kiln dried Douglas Fir $1\frac{3}{8}$ in. thick, glazed clear glass. Automatic cylinder lock on the section which swings inward.

Slide Over Doors

Latest Overhead Type Doors at Small Extra Cost

Open or close in 3 seconds with a 3-pound pull. Tracks and guides of cold rolled steel in easy curve above opening. No cords. Strong torsional springs good for entire life of garage, hold door in any position and positively prevent its descending until you pull. Quick, sure, dependable in any weather. Best kiln dried Douglas Fir, 8 ft. by 7 ft. 3 in. $1\frac{3}{8}$ inch thick.

**Neither of the types above are
suitable for garages on pages 6 and 7**

SEARS PLAY HOUSES *are Ideal*

Illustrated below is our Log Cabin play house or small cabin for storage of garden tools, lawn mowers and hose. It is offered in three popular sizes, and provides excellent outdoor recreational facilities for youngsters of all ages.

Colonial Design Also

This same play house is available in Colonial architectural

treatment, with 1 by 6 drop siding in place of log siding, or with $\frac{3}{4}$ by 10 Bevel Siding and sheathing. (See the price list insert.) This Colonial treatment is not illustrated here; but painted white, with dark green shutters and roof of harmonious color, it is an attractive building for any lawn.

SPECIFICATIONS

FLOOR JOISTS: 2x4 in. spaced 18 in. or 24 in. O. C.
FLOORING: 1x6 in., No. 1 grade, tongued and grooved.

STUDDING: 2x3 in., spaced 18 in. or 24 in. O. C.

RAFTERS: 2x3 in., spaced 18 in. or 24 in. O. C.

ROOF BOARDS: 1x6 in., square edged, laid tight for roll roofing.

WINDOWS: 1 $\frac{3}{4}$ in. pine, 6 light single sash to swing in. One window each side; 8x10 ft. cabin has a third window in the rear.

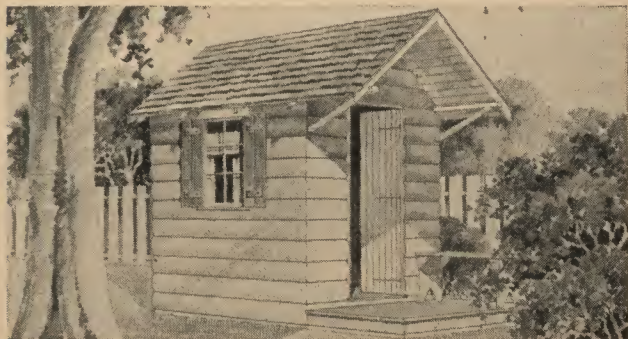

DOORS: Batten type door.

SIDING: Log siding—cut special from 2x6 in. timbers to be mitred at corners or Colonial siding, as described above.

PAINT: Two coats of stain for Log siding or two coats Sears best grade paint for Colonial siding. Two coats of Sears best grade paint for exterior sash and trim.

Hardware, Nails, Roll Roofing and material for shutters included in our price.

(Note)—6-inch cedar foundation posts 4/0 long can be furnished at small cost. Could be built on masonry piers or solid masonry wall.

FLICK an electric light switch, or lift a telephone receiver, and at once an intricate **SYSTEM** begins to serve you.

Our Home Construction Division is like that too! At your command are more than 2,500 trained people who offer you:—

Planning Advice: Working with your architect, or adapting proven plans of ours to your individual needs, we assure you of a building correctly designed in every respect.

Financing Aid: Liberal loan plans will be worked out for you, based upon your ability to pay conveniently.

Splendid Savings: Buying by the million, for cash, as we do, numerous savings are made and passed on to you, without any sacrifice of quality.

Factory-Cutting: Much of our material is prefabricated in our own huge mills and factories as described on the next page. The craftsmen who operate these modern machines save you time and money.

Guarantee: And every phase of every transaction is backed by all the ideals and traditions of this organization, nearly half a century old and with resources of more than two hundred millions of dollars!

WORLD'S LARGEST

An Invitation

If you live anywhere near our great yards and factories, in Cairo, Ill., Norwood, Ohio, or Port of Newark, N. J., let us show you how we save you money!

The illustrations above are two views in our great Newark Plant, largest of its kind in America. Ocean-going vessels here unload at our very door, and modern efficiency reigns supreme in every detail of the handling.

Here are machines that make magical cuts; devices that drill square holes; assemblies that in one operation perform milling that would take the most expert craftsman hours to do by hand. And precision is absolute! Rafters, for instance, are cut

truer than any carpenter could cut them the old fashioned way; yet the operation takes but a second.

The huge storage sheds will interest you too, and enable you to understand how we can take advantage of favorable markets, buying when prices are low and passing these savings on to you.

Trucks and freight cars run right into the big buildings, and are loaded economically; you'll see lumber carriers pick up tons of lumber and transport it easily from storage shed to mill, and giant cranes carrying enormous loads from one part of the sheds to another. And when at last you leave, you'll better understand one phase at least of our ability to save you money on residential construction work of any kind!

HOME BUILDERS . .

SEARS LOG CABINS

Log cabins were originally built of complete sections of trees, with the bark left on. Modern construction, however, favors the use of log siding, as illustrated here. Sears log siding, cut special from rugged 2 x 8 timbers, has all the bark removed, thus eliminating the possibilities of insects getting beneath the bark. The flat-

ness of the inside is another feature that simplifies construction, lowers costs, and reduces shipping weights.

And instead of chinking the cracks between the rough logs, with moss or clay as in old fashioned cabins, Sears siding is precision-cut to form a weather-tight lap joint.

Log Cabin Specifications

GIRDERS AND SILLS—Built-up of 3 members 2x6 in. each, forming extra strong 6x6 in. unit.

FLOOR JOISTS—2x8 in., spaced 22 $\frac{3}{4}$ in. apart.

PORCH JOISTS—2x6 in., spaced 22 $\frac{3}{4}$ in. apart. Supported by 2 member sills and girders built-up of 2x6 in. timbers.

FLOORING—1x4 in., flat grain flooring for main building and porch, except Carson Garage 707-B which has no wood floors at price shown.

STUDDING—2x4 in., spaced 22 $\frac{3}{4}$ in. apart. Door and window headers included.

PLATES—2x4 in., Single plate at floor and built-up rafter plate of 2 pieces of 2x4 in.

RAFTERS—2x4 or 2x6 in., spaced 22 $\frac{3}{4}$ in. apart. Ridge boards 1x4 in. or 1x6 in.

ROOF BOARDS—1x6 in., dressed and matched, laid tight. When wood shingles are ordered, roof boards 4 in. wide are furnished for spacing 2 inches apart. (Nipigon includes roof boards for wood shingles.)

LOG SIDING—Cut special from 2x8 in. timber, to be mitred at corners. All bark removed.

VERGE BOARDS—2x6 or 2x8 in., forming show rafters at gable ends.

INSIDE PARTITIONS—1x6 inch "V" boards set vertically in floor plate built of 2 pieces of 1 $\frac{3}{4}$ x1 $\frac{3}{4}$ in., shoe, and special 2x4 in. top partition

grooved to receive partition boards. A 1x4 in. chair rail extends horizontally between uprights on one side of partition. For the Nipigon, vertical paneling is furnished for the walls in the Living Room and for the interior walls only in balance of rooms.

PORCH COLUMNS—6 or 8 in. square.

DOOR AND WINDOW FRAMES—Clear Cypress.

WINDOWS—1 $\frac{3}{4}$ in. pine 8 or 12 light check rail sash. Molding trim on inside. Special design trim on outside. 1 $\frac{3}{4}$ inch 6-light sash for Carson.

DOORS—Exterior White Pine or Fir 1 $\frac{3}{4}$ in., 1-light, 3 panel. Interior—5 cross panel door.

HARDWARE AND NAILS—All necessary finish hardware consisting of door butts and locks, window locks, and spring bolts for holding sash in position. Sufficient quantity of nails to construct cabin complete.

PAINT—2 coats of siding stain. 2 coats of Sears best grade paint for porch floor, outside doors, and exterior of sash and window frames. 1 coat of stain and wax for paneling in Nipigon.

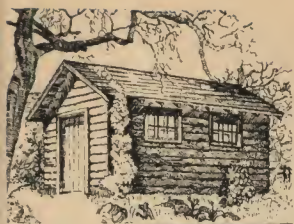

ROOFING—Oriental Slate Surfaced Roofing, red or green, ridge and flashing as required. Guaranteed 17 years. For Nipigon specifications include 16 in. Red Cedar shingles for roof.

NOTE: 6-in. Cedar Foundation Posts 4 ft. long can be furnished at small additional cost. Could be built on Masonry Piers or Solid Masonry Wall.

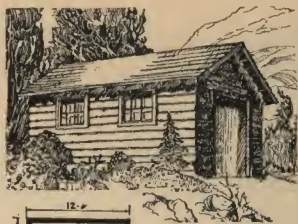

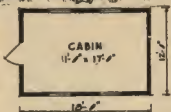

These Specifications Are Guaranteed Accurate

They are intentionally statistical. When we say "3x6 No. 1 Yellow Pine or Fir," we believe that tells you more than if we said "extra strong knotless material that is more than sufficiently sturdy, and which will look beautiful when stained and varnished."

Many specifications read that way; they sound well but are indefinite as to GRADE and KIND of material. Please remember this when you compare Sears unusually high specifications with any others that may be submitted to you.

**Carson

**Carson
Garage
Plan
No. 707B**

Triple Purpose One Room Cabin

The CARSON No. 707 A and B

The two variations of this popular one room log cabin make it suitable for a variety of uses. Low in price, yet sturdily built of splendid materials, it is one of our most widely known designs.

AS A CABIN:

The interior is large enough to accommodate several cots, a table, gasoline stove and shelves. Four windows admit plenty of light and ventilation. Door 1 $\frac{3}{8}$ in. thick, 1 light, 3 panel, Ponderosa Pine or Fir.

AS A GARAGE:

Many of these are sold as auxiliary cabins to larger designs, and used to furnish the protection your car deserves while in the woods. The size, 11 feet wide by 17 feet long, permits accommodation of the average car. Doors as shown are of regular hinged type.

AS A BOATHOUSE:

Built on piles, over the edge of your favorite lake or river, this cabin harmonizes well with the rustic setting and provides the necessary protection for small motor boats or other craft. A nautical touch is often provided by erection of a stub mast for flags, and life preservers, or old ships' lanterns, on the exterior.

See Insert for Prices

Two Rooms and Porch in This Carefree Cabin

The FOXCROFT—

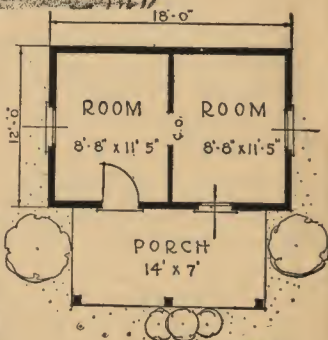

Plan No. 708

Already Cut and Fitted.

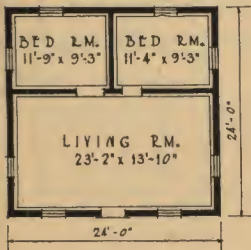

Quickly and Easily Erected.

No man-made structure harmonizes so well with natural settings as a rugged log cabin. No other so well combines "roughing it" with the opportunity for most of the comforts of home life. And now, by mass production, and standardization upon a relatively few designs of proven popularity, Sears provides really sturdy and attractive cabins at surprisingly low cost.

The FOXCROFT, 18x12 ft., is a splendidly proportioned little cabin, with two rooms of good size and a cozy 14x7 ft. porch which can easily be screened in. Three windows and a glazed front door admit plenty of light. One room is often used for cooking and living purposes, while the other is devoted to sleeping accommodations. A curtain hung in the right-hand room provides two separate compartments of reasonable privacy and of ample size for several cots.

**More and better material
in Sears guaranteed cabins**

Simple and Sturdy with Extra Large Living Room

The HUDSON—Plan No. 706
Two Bedrooms and
Big Living Room

Trim, neat, and unpretentious, this rugged cabin is particularly popular because of the large living room which runs the full width of the cabin. This room is 23 ft. 2 in. by 13 ft. 10 in., with lots of light and ventilation from four windows.

The HUDSON has two bedrooms with cross ventilation, one 11 ft. 9 in. by 9 ft. 3 in.; the other 11 ft. 4 in. by 9 ft. 3 in. If one bedroom is enough for your requirements, the other would make a splendid kitchen, especially if a rear door be added. Or, the two bedrooms could be made smaller and the space between them could be used for a small bathroom and a little hall connecting bedrooms and living room.

Such practical changes are possible in any of Sears cabins, thus providing for innumerable other plans at low cost.

Specifications on Page 18
Prices on special colored insert

Frontier Simplicity in this Sturdy Log Cabin

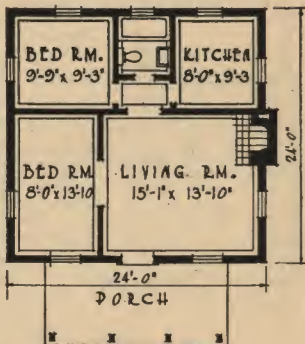

LINCOLN—Plan No. 705

*Four Rooms, Bath,
Porch and Fireplace*

The Lincoln Log Cabin possesses a rugged simplicity and sturdy strength suggestive of pioneer days, but its rustic appeal is not lessened by the addition of such modern features as bathroom and full sized windows to give cross ventilation to each of its four rooms.

Easy to Build

With Sears simple plans, factory cut material, and plain instructions, very little building experience is required. The log siding is flat on one side and easy to handle. The Lincoln is 24 ft. square with porch 17x8 ft., an economical size, yet providing 4 cozy rooms, bathroom, and center hall. Is now furnished with 8-light windows and a 3-panel, 1-light front door.

One order brings it all. No shopping around, no extras, no shortages. Nothing to worry about when buying a Sears Cabin.

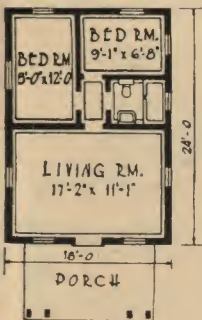

Rugged Cabin With Popular Floor Plan

The CROCKETT—Plan No. 703
Three Rooms, Bath, Hall,
and Porch

This typical log cabin, 18 feet by 24 feet, has a floor plan which is perhaps the most popular of the present season. In looks, living arrangement, and low cost, the Crockett, with Sears high grade specifications, is an outstanding value.

All Rooms Off Hall

A center hall connects all rooms and bath. Each of the two bedrooms has windows on two sides. The light and well ventilated living room is 17 feet 2 inches by 11 feet 1 inch. It has four windows and a glazed front door affording light and air on three sides. The front porch is 8 feet by 14 feet and will be the most delightful spot in the cabin if screened. See colored insert for price of cabin and screens.

Specifications on Page 18
Prices on special colored insert

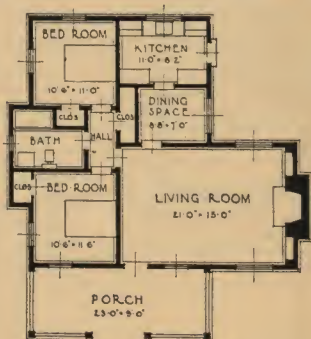

The Nipigon No. 711 Five rooms with special features

Unique log cabin home of unusual comfort and sturdiness

Pine panelling in all rooms, and a plan which provides extraordinary comfort and convenience, give this deluxe log cabin home an appeal which endears it to family and guests alike.

From a porch 23 by 9 ft. a glazed door leads to a living room 21 by 15 ft., with large fireplace flanked by open shelves, wide wall spaces, and twin windows on opposite walls. Between this and the kitchen is space suitable for dining and other uses.

The step saving oblong kitchen has 2 windows over the sink, and a side door. Material for 2 kitchen cases included. Bath, 2 bedrooms, and a long storage closet open off hall. Front bedroom, $10\frac{1}{2}$ by $11\frac{1}{2}$ ft.; rear bedroom, $10\frac{1}{2}$ by 11 feet, both with cross ventilation and a closet. The bath is arranged for recessed tub and a lavatory near window. The cabin is 32 ft. from front to back, plus the 9-foot porch. It is 36 ft. 4 in. wide at the widest

point and requires a lot 43 ft. or more in width. Peeled log siding cut from 2x8 timber, is laid over strong, well-braced framing. Fireplace may be built of field stone or any suitable material which is found near the building site.

and simple plans. A complete service
backed by a 200 million dollar guarantee.**

SEARS SUMMER COTTAGES

Sectional Type

Our two sectional cottages are our most economical designs. They are built of sections, cut, fitted, and accurately assembled in our factories, ready for bolting together on the lot. Doors and windows are already hung in frames.

As mentioned on the inside of the front cover, these are not to be confused with our regular homes or cottages.

Specifications

SILLS—3x8 in.

WALL SECTIONS—Drop Siding, 1 in. thick, finished standard with tongue and groove, smooth on inside. Sections are 3x7 ft. tongued and grooved together with reinforced, interlocking joints, made of 3 thicknesses of 1 in. lumber.

INSIDE PARTITIONS—Section 3x7 in. made of beaded ceiling, $\frac{3}{4}$ in. thick.

FLOOR SECTIONS—Of 1x4 in. tongued and grooved No. 1 flooring.

ROOF SECTIONS—Of beaded ceiling $\frac{3}{4}$ in. thick. Sections 3 ft. wide.

ROOFING—Oriental Slate Surfaced, red or green, shipped in rolls with cement. Guaranteed 17 yrs.

DOORS—2 ft. 6 in. x 6 ft. 6 in., 1 $\frac{3}{4}$ in. thick. Locks mortised. Outside doors glazed upper half.

WINDOWS—Pine, 2 light plain rail type, 1 $\frac{1}{4}$ in. thick. With spring bolts.

PAINTING—Entire outside of cottage primed one coat of gray paint and trimmed with one coat of white paint. Sections fit perfectly, interlocking on both sides, at top and bottom, firmly bound in place by sills and plates securely bolted into position. Expertly constructed and nailed with rustproof, cement coated nails. The 3-inch joints are actually stronger than 2x4 in. studding.

All material is carefully seasoned, strong, durable, and easy to paint. We furnish No. 1 grade lumber—Douglas Fir, or Yellow Pine, at our option.

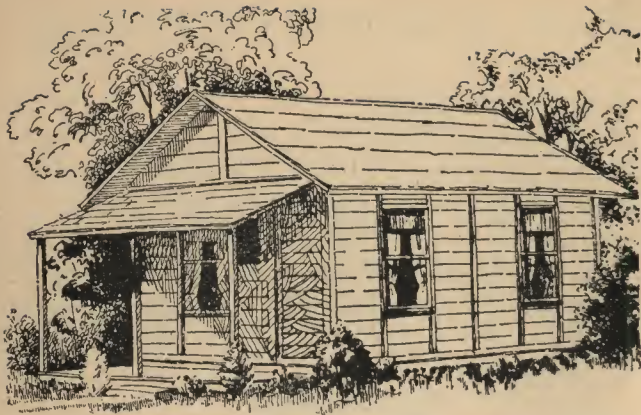

NOTE: 6 in. cedar foundation posts 4 ft. long are included in price. Could be built on masonry piers or solid masonry wall.

These Specifications Are **Guaranteed Accurate**

They are intentionally statistical. When we say "3x6 No. 1 Yellow Pine or Fir," we believe that tells you more than if we said "extra strong, knotless material that is more than sufficiently sturdy, and which will look beautiful when stained and varnished."

Many specifications read that way they sound well but are indefinite as to GRADE and KIND of material. Please remember this when you compare Sears unusually high specifications with any others that may be submitted to you.

On Special Colored Insert**

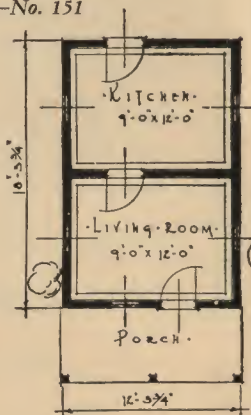

Our Lowest Priced Summer Cottage

The PARKLANE—No. 151

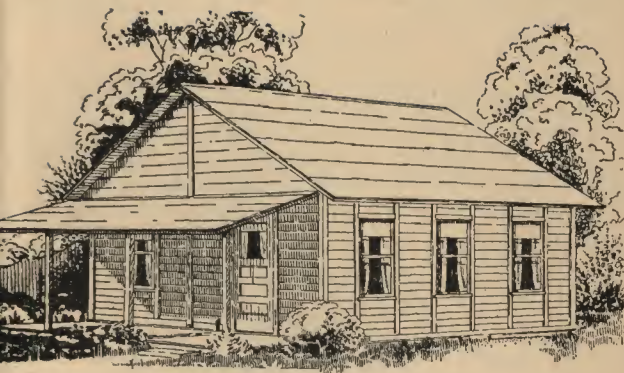

Thousands of folks, when planning their vacations, think only in terms of that particular year. The end of a vacation leaves them with some badly worn tires, a bundle of cancelled checks, and a bunch of photographs.

How much more intelligent to make a vacation investment which will bring happiness to you and your family for years to come!

The Parklane, sectional summer cottage, with two rooms, each 9x12 ft., and with a pleasant porch which can easily be screened, offers you a real summer home for just about what it would cost you to take a party of four to some resort hotel for a couple of weeks. It has 5 windows, 2 outside doors, and a door between the rooms. Simple and neat, it is the most economical of our summer cottage designs.

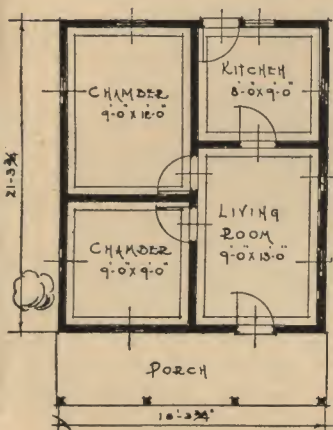

**Specifications
Of Summer
Cottages On
Page 25**

Four Room Sectional Cottage

The FOURSOME—No. 150

The Foursome is a 4-room cottage of the same economical type of construction as the Parklane on Page 26.

It has four rooms, surprisingly large. The living room is 9 ft. by 13 ft., the kitchen 8 ft. by 9 ft. The front bedroom is 9 ft. square and the other bedroom is 9 ft. by 12 ft. Eight windows, two outside doors, and a porch more than 18 ft. long, are additional features of this splendid low-cost cottage.

Please don't confuse these sectional designs with our regular homes and cottages built in the usual way. See explanation on the inside front cover of this little booklet.

**Prices Are
Shown On The
Colored
Insert**

SEARS SUMMER COTTAGES

Factory-Cut Type

Our "factory-cut" cottages are individually built just as any good carpenter would build them. The only difference is that most of the sawing and waste has been eliminated at our factories, by cutting and numbering the framing members, ready for nailing into place. This not only saves time and money in erection, but assures perfect precision fitting of all parts.

**See Page 17 for Description of One of
Our Great Factories**

Specifications

FOUNDATION POSTS—6 in. Cedar Posts, 4 ft. long.

SILLS—4x6 in. or 6x6 in.

FLOOR and PORCH JOISTS—2x6 and 2x8 in., spaced 22 $\frac{3}{4}$ in. apart.

FINISH FLOORING—1x4 in. flat grain flooring.

PORCH FLOORING—1x4 in. flat grain flooring.

STUDDING—2x4 in. spaced 22 $\frac{3}{4}$ in. apart. Door and window headers included.

PLATES—2x4 in. Single plate at bottom and double plate at top of all outside walls.

RAFTERS—2x4 in., spaced 22 $\frac{3}{4}$ in. apart.

ROOF BOARDS—1x6 in., dressed and matched, No. 2 grade, laid tight. When wood shingles are furnished, roof boards are 4 in. wide, spaced 2 in. apart.

SIDING for OUTSIDE WALLS—Bevel siding 6 in. wide and $\frac{3}{4}$ in. thick. No sheathing included.

SHINGLES for OUTSIDE WALLS—Where shingled walls are illustrated, we furnish edge grain 5 to 2 Red Cedar Shingles, for laying double courses with 9 $\frac{3}{4}$ in. exposure. 1x6 in. sheathing also furnished.

OUTSIDE FINISH—Corner boards, fascia, frieze, moldings, etc., select grade, sound and well seasoned.

INSIDE PARTITIONS—8 ft. 5 in. high, of $\frac{5}{8}$ x3 $\frac{1}{4}$ in. matched ceiling lumber, placed upright.

DOOR and WINDOW FRAMES—Select grade with 1x4 in. outside casings and cypress sills. Furnished knocked down and bundled.

WINDOW SASH—Clear white pine, good quality glass firmly tacked and puttied.

OUTSIDE DOORS—2 ft. 8 in. x 6 ft. 8 in., Fir or White Pine upper half glazed. Mortised for lock.

INSIDE DOORS—2 ft. 6 in. x 6 ft. 8 in., Fir or White Pine five cross-panel design.

HARDWARE and NAILS—Lemon brass finish mortised lock sets and door butts for outside doors. Rim locks for inside doors. Spring bolts for windows. Nails sufficient to build cottage complete.

PAINT—Sufficient paint with oil for thinning, for two coats on outside body and trim. Shingle stain for one dip coat for shingles on walls.

ROOFING—Fire Chief Shingle Roll Roofing, red or green, guaranteed 17 years.

THESE SPECIFICATIONS ARE GUARANTEED ACCURATE

They are intentionally statistical. When we say "3x6 No. 1 Yellow Pine or Fir," we believe that tells you more than if we said "extra strong, knotless material that is more than sufficiently sturdy, and which will look beautiful when stained and varnished."

Many specifications read that way; they sound well but are indefinite as to GRADE and KIND of material. Please remember this when you compare Sears unusually high specifications with any others that may be submitted to you.

Prices Are Shown on Special Colored Insert

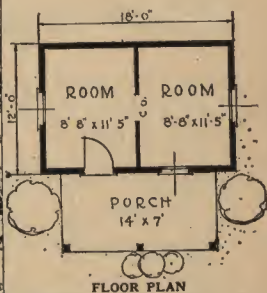

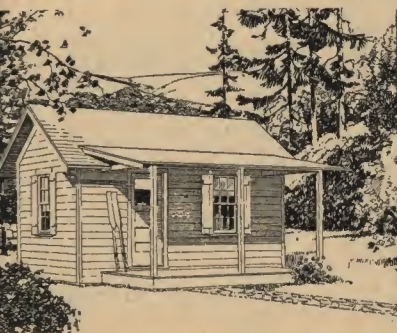

Attractive One Room Cottage

The HUNTLEY—No. 611

Seldom is such neat appearance found in a little building like this. And its possibilities are endless! Hunters, fishermen, small camping groups and other outdoor parties find in this design exactly what they need. The cottage is also splendid for a way-side stand or as a playhouse for youngsters.

The size is 12 feet by 9 feet and there are two windows and one door. The front porch, 12 feet by 7 feet, can easily be screened to provide additional sleeping quarters if desired. See page 28 for specifications; colored insert for prices.

Popular Two Room Design

The NORBROOK—No. 601

With two rooms, each 8 feet 8 inches by 11 feet 5 inches, this small cottage is ideal for the average small family's requirements. The porch, 14 feet wide by 7 feet deep, can be screened and used as extra sleeping quarters.

There are three windows and one door. The two rooms are separated by a cased opening, and privacy can be increased if a curtain is hung in this opening. A cottage like this is an investment that will bring you and your family happiness for years to come.

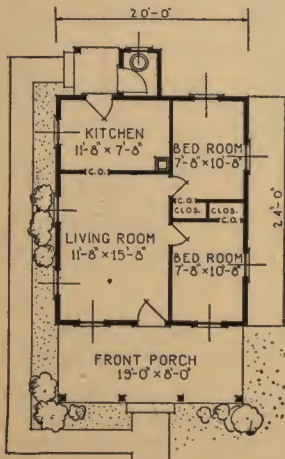

Colonial Design for Summer Cottage Choice of Four or Five-Room Plans

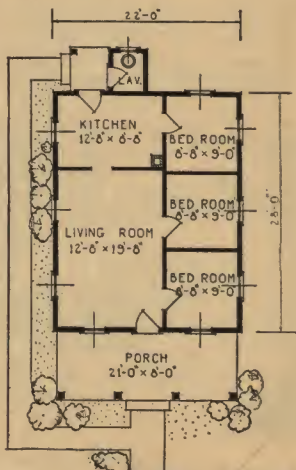

SUNNY LANE—Plan 605A and Plan 605B

Gracious simplicity and such authentic details as Colonial windows, porch coping, ventilating louver, and shutters (so practical for end of season closing), give the Sunny Lane real distinction at very low cost. Easily and quickly built with Sears simple plans and factory cut materials.

The two plans differ only in size and number of rooms. Each has combined living and dining rooms,

Plan 605A—4 Rooms

Plan 605B—5 Rooms

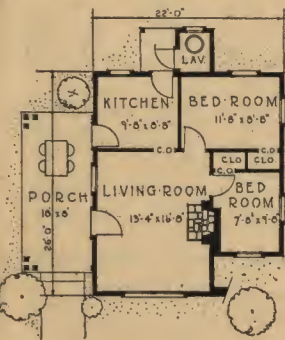

8-ft. porch full width of house, and lavatory off small back porch.

At Left: Plan 605A with 2 closets and 2 cross ventilated bedrooms larger than bedrooms in Plan 605B. Is 20x24 ft. and needs 26-ft. lot. Above: Plan 605B with 3 bedrooms and a larger living room and kitchen than in Plan 605A. Is 22x28 ft. and needs a 28-ft. lot.

Good Design for Suburban Area or Summer Colony

SKYWATER No. 602 has large living room and big porch

This 4-room English cottage with characteristic steep roof and massive chimney, has shingled walls shaded by pergola porch 18 ft. by 8 ft., opening from both living room and kitchen.

The pleasant living room with cozy fireplace opposite entrance, has ceilings in California studio effect. Because all ceilings are open to the rafters for perfect air circulation, and partitions are of matched ceiling lumber, the house is very easy to build. Factory cut lumber, doors mortised, everything easy to put together. Requires 35 ft. lot.

Lavatory off small covered back porch. Both porches have wood floors. 2 cross ventilated bed rooms with closets. Partitions 8 ft. 5 in. high. For specifications, see page 28.

Remember that all Sears materials are backed by a 200 million dollar guarantee of satisfaction. It's Safe to Save at Sears.

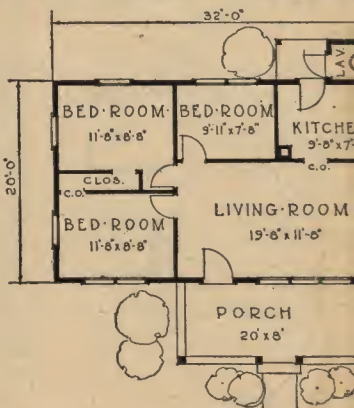

Pleasant and Practical Cottage at Very Low Cost DOVE HAVEN, No. 603—With Three Bedrooms and Big Porch

Shaded by wide eaves and sheltered by a porch 20 ft. by 8 ft., this hospitable bungalow has 5 comfortable rooms, lighted by 15 windows. Ceilings open to the rafters for perfect ventilation.

The house is 32 ft. by 20 ft., not counting porch, and needs a 38 ft. lot. All rooms off large living room, which has 5 windows. Large closet serves 2 bedrooms. Third bedroom may have door to kitchen and be used as dining room if preferred.

Lavatory off small rear porch allows removal of swimming suits before entering bedrooms. Solid rail permits economical screening of porch. All rooms well lighted.

Increase your pride and satisfaction in your summer home by building a Second cottage of good design and sturdy construction.
